Help

Click on the arrow next to "gwb". This will pop down the various machines of gwb.

Ignore the machine 'localhost'. Clicking on any other machine name will show the corresponding plots on the right hand side of the page.

Each page shows a fixed number of graphs and the next pages may have to be seen for the required graphs.

Please ignore the ib speeds as they are not correct and some work is being done on that section.

The tool is user friendly, however in case of any queries please contact me (Shelton) on my mail id or on extension number 8365.

email: shelton@gmrt.ncra.tifr.res.in
